IHE International — Integrating the Healthcare Enterprise

IHE CERTIFIED PROFESSIONAL PROGRAM

The IHE Certified Professional Program (IHE-CPP) was developed to offer individuals opportunities to prove their knowledge of IHE and certify themselves as "**IHE Certified Professional**" for certain topics.

These certificates are **globally valid** and the only **IHE governed certification scheme world-wide**, ensuring that certificate-holders are globally identified as experienced and proven IHE experts.

*The first in a planned series of exams offered is the **IHE Foundations Exam**.*

IHE FOUNDATIONS EXAM

EXAM

The IHE CPP – IHE Foundations Level Exam is tailored to the needs of professionals in health IT who work with products utilizing IHE profiles and may be employed by healthcare provider organizations or software development companies or work as consultants in systems integration. The certification is designed for a broad target group.

GOAL

After passing the exam, participants will be able to apply the IHE methodology (ISO/TR 28380) for developing interoperability specifications for an existing healthcare environment. The course will enable participants to acquire the skills needed to identify and use the appropriate IHE profiles when faced with a healthcare interoperability project.

After successfully passing the exam, participants will receive the *IHE Certified Professional – IHE Foundations* certificate. The certification will be issued by the exam provider on behalf of IHE International.

The certificate will be valid for a period of **5 years**. Upon expiration certificate-holders may extend the certificate-ownership period by re-certifying.

EXAM FACTS:

- ✓ Duration: 60 minutes
- ✓ 40 multiple-choice questions
- ✓ Exam language: English
- ✓ Time bonus for non-native speakers

GASQ

GASQ offers exams via remote proctoring or on site in accredited exam centers. Group exams can also be arranged, in conjunction with training by a certified provider.

LEARNING OBJECTIVES

1. Orientation on the IHE organization

This module covers general information on Integrating the Healthcare Enterprise, its mission and vision, as well as its organizational structure. Furthermore, it demonstrates tasks and responsibilities of IHE internal units and the roles of external stakeholders. IHE specific principles of governance are also described in detail in the chapter.

2. IHE Methodology

This chapter aims to provide information of the main concepts and document structure of IHE Technical Frameworks, as well as the annual IHE review and development cycle used in each of the nine IHE clinical and operation domains.

3. Locating and navigating through IHE resources

IHE offers a large variety of technical documents to support planning and implementation of IT systems in healthcare, as well as a wealth of development and educational materials. This module targets the ability to find the needed information from the available array of options and use it accordingly.

4. IHE Example profiles, base standards, general healthcare IT knowledge

This chapter is designed to provide knowledge and comprehension of the standards for communication among IT systems using IHE profiles. Participants will learn the basics regarding the technical environment of selected IHE profiles and the technologies, standards, and security requirements used in them.

5. Accelerate Health Information Exchange deployment

In addition to technical standards and requirements, legal and organizational issues must be addressed during the integration of processes and IT systems. This module demonstrates the use of "IHE Interoperability Use Case Deployment Methodology" to support real world deployment.

PREPARING FOR AN EXAM

You can prepare for an exam either by self-study or with the help of courses provided by training providers. While attending a training course may improve your chance of success on an exam, training is not a prerequisite.

Trainings are available worldwide and can be booked via accredited training providers.
