# User Experience Qualification Center

## Defining Standards for User Experience and Usability Worldwide

Mastering the rules of UX and Usability is definitely a key part of developing a successful website, application or program. UXQCC, the User Experience Quality Certification Center defined a globally recognized and valued standard for UX organizations and companies with their new certification scheme. Theoretical knowledge, practical skills and didactic excellence are combined to form this very advanced scheme for UX education.
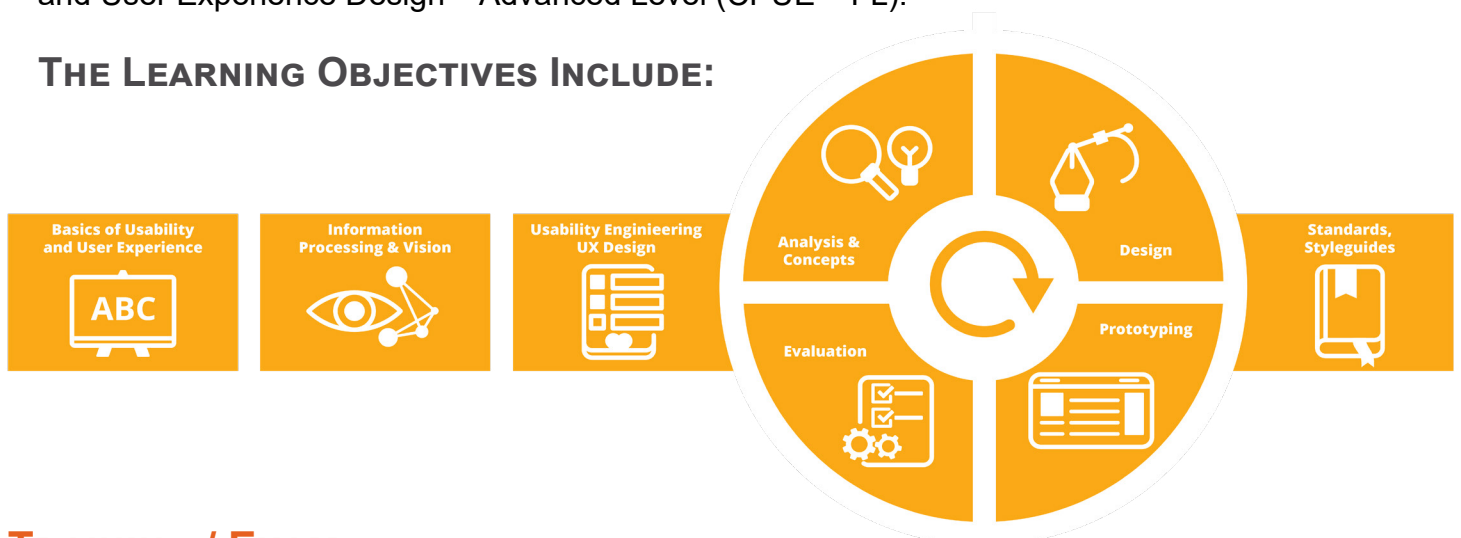

## Foundation Level

Certified Professional for Usability Engineering and User Experience Design – Foundation Level (CPUE-FL)

The Foundation Level is designed to address all persons involved in the design and development of software and other products, like:

- software engineers,
- scrum masters,
- UX designers,
- user-interface designers,
- quality managers or
- IT project managers.

Basic knowledge in software/product design or development is required. The Foundation Level certificate qualifies for the next step – the UXQCC Certified Professional for Usability Engineering and User Experience Design – Advanced Level (CPUE – FL).

## The Learning Objectives Include:

## Training / Exam

Exams can be taken either online or on paper, and are carried out by the international exam provider GASQ to ensure quality and reliability. https://www.gasq.org/en/
